If you need a statement for your Organic certifier, you can refer them to this page.

Non-Organic

Our seeds and planting stock are not Organic. They are, however, grown with no pesticides or herbicides of any kind.

GMO

None of our products are GMO.

Seed Treatments

Certain seeds are treated with bleach and trisodium phosphate to reduce disease transmission. This is not a persistent treatment, but a cleaning step during seed processing. The crops that receive this treatment are dahlia, Jerusalem artichoke, oca, potato, ulluco, and yacon.
